TECHNICAL SKILLS

- Programming Language:
Python
- Web Technologies: HTML
- Concepts:
- Variables, loops, functions
- Lists, dictionaries
- Basic file handling
- Logic building & automation basics
- Tools: GitHub, VS Code, Microsoft Excel
- PROJECTS

LANGUAGES

- ENGLISH
- HINDI
- MALAYALAM
- KANNADA

SOFT SKILLS

- Problem-solving mindset
- Quick learner
- Attention to detail
- Good communication

PROFILE

I'm a BCA 3rd-year student with a growing interest in Python programming and how automation and data handling are used in real-world applications. I enjoy working on practical projects that help me understand concepts beyond theory. I've built a Python-based To-Do application and a personal portfolio website using HTML, which helped me improve my problem-solving skills, logical thinking, and code structure. I'm currently looking for an internship where I can gain hands-on experience, learn from experienced professionals, and contribute meaningfully to ongoing projects.

PROJECTS

To-Do Application

Developed a functional To-Do application using Python logic for task management. Implemented features such as task addition, deletion, and status tracking. Focused on clean logic, user-friendly structure, and modular code design.

Portfolio Website

Designed and built a personal portfolio website using HTML. Showcases skills, projects, and contact details in a structured format. Focused on semantic HTML and clean layout for readability.

EDUCATION

Bachelor of Computer Applications (BCA)

Bangalore City University (BCU)

MS Ramaiah College of Arts, Science and Commerce

Expected Graduation: 2026

Pre-University, Sindhi PU college, Bangalore (2021-2023)

Kensri School and College, Bangalore (2018-2021)
